

dSECURE:

Makes Microsoft Office Secure

Protection for Critical Emails and Documents

IAI, in association with **Global Integrity**, provides a patented, integrated and automated capability to encrypt and protect most Microsoft Office documents (Word, Excel, PowerPoint) as they are being created or revised. Other common files (such as PDF, JPG, AVI, MP3, MP4) may be encrypted for transit via email or stored on a computer system. In addition, emails between authorized parties can be encrypted for secure communications in standard or disguised “stealth” mode at the touch of a button.

FIPS 140-2 Encryption Software

- Enhanced Crypto to prevent third party access to and illicit use of critical files, documents, emails and intellectual property
- No “backdoors” means of access
- No “keys” to be intercepted
- Software only solution
- Sensitive information is kept secure (encrypted) from creation to deletion

Desktops/Laptops/Tablets

- Supports standard PCs and Tablets
- Plug-in to with MS Office 2007 and above (.docx/.xlsx/.pptx/Outlook)

Key Features

- Encrypted documents/files only usable on client designated systems and platforms
- Protects data during security breaches
- Files and emails may be securely stored/shared among individuals, designated groups, or entire enterprise
- Security is managed by a minimum of two administrators (2-person rule)
- Search button for secure emails

Applications

- Civilian US Government agencies
- US Military applications
- Healthcare/HIPPA applications
- Private and Public companies
- Universities and school systems
- Legal and financial institutions
- Professional organizations
- Individual user privacy

Easy to Use and Cost-Effective

- Automatic encryption protection
- Transparent to end users
- User friendly control features
- Simple to manage and administer
- Custom and Enterprise programs available

Training and Maintenance

- Requires minimal training and minimal changes in normal activities
- Only minimal training of administrators required
- Maintenance support available
